

| Speciality | Speciality description | Class | Duration | Price | Course instructor |
|--------------------------------------|--|---|------------|-------|-------------------|
| Web Programming | Web programming aims to teach learners about how websites are coded and structured. We will be exploring HTML, CSS and Javascript as our programming language. By the end of the topic, learners can fully create a website with an aesthetic interface and advance functionality. | Web programming fundamentals | 5 lessons | RM70 | Yap Khai Yuan |
| | | Web programming advanced | 5 lessons | RM140 | Yap Khai Yuan |
| Python Automation & Machine Learning | Python is a multi function easy to learn programming language, We will be developing Python bots, scripts and automation. By the end of the course, learners will understand basic Python concept to progress further into advance Python infrastructure to build web apps, games and to be used in data science. | Python Programming Fundamentals | 5 lessons | RM70 | Yap Khai Yuan |
| | | Advance Python Infrastructure Engineering | 5 lessons | RM140 | Yap Khai Yuan |
| Ethical Hacking | Learning how to hack can help learners implement the strongest possible security practices. It's as much about finding and fixing security vulnerabilities as it is about anticipating them. Learning about the methods hackers use to infiltrate systems will help you resolve issues before they become harmful. By the end of the course, learners can conduct penetration testing and network hacking. | Computer science fundamentals | 1 lesson | RM30 | Yap Khai Yuan |
| | | Computer network and general knowledge | 2 lessons | RM40 | Yap Khai Chuen |
| | | Scripting and pen testing tools | 5 lessons | RM100 | Yap Khai Yuan |
| | | Training and advance cipher usage | 5 lessons | RM100 | Yap Khai Chuen |
| C# Programming | C# abstracts away most of the machine-level code, so you can focus more on programming. The C# language is good for beginners for these reasons. The C# language is used by the Unity engine to make games, the .Net framework to create websites, and more broadly for Windows application development. | C# Fundamentals (Console) | 5 lessons | RM100 | Yap Khai Chuen |
| | | C# Advance (Unity game development/website/native apps) | 10 lessons | RM200 | Yap Khai Yuan |
| Video Editing | Video editing is important because it is the key to blending images and sounds to make us feel emotionally connected and sometimes truly there in the film we're watching. We will be exploring the basic of colour grading, video editing and motion graphics in this course. By the end of the course learners can create a professional video with beautiful colours, visuals and graphics. | Video editing fundamentals | 6 lessons | RM120 | Lim Kai Le |
| | | Video editing advance | 6 lessons | RM120 | Yap Khai Chuen |
